

## School of Medicine

<http://www.ttuhschool.edu/som/>

Since its founding in 1969, the School of Medicine has produced countless qualified physicians.

Since that time, the school has worked diligently to provide innovative educational opportunities to medical students and residents.

In addition to an MD degree, the Texas Tech School of Medicine offers three dual degree programs: (1) MD/PhD, in which the requirements for both degrees can be completed in seven years; (2) JD/MD degree, which allows students to obtain their medical and law degrees in a six-year program; and (3) MD/MBA, in which students receive both degrees in four years. TTUHSC is only one of a handful of schools to offer the MD/MBA degree.

Finally, in 2010 the School of Medicine launched the innovative Family Medicine Accelerated Track, in which select medical students can complete their medical education in three years rather than four. The first program of its kind, this initiative seeks to address the growing need for primary care physicians.

Medical students at the TTUHSC School of Medicine can expect to gain valuable learning experiences at the Amarillo, Lubbock, and/or Odessa campuses.
